

March 13, 1974

with Senator Warner that the bill should be killed. I also do not believe that because the parties are in low profile at the present time that we should take further swats at them and to cripple them more so and to destroy the function of the parties completely. And if it is possible at all, I think that this bill should have new breathe placed into it today. Let it go on and straighten out the Syas amendment which is horrible and then be able to do the job of seeing that the people once and for all have the opportunity to vote on it. And I say to Senator Syas since he is the new leader of the Independents as he has spoken and has talked here today, he has defended the Independents and has talked about them as a party, that it is important that that particular party have its representation. And the way that they would have their representation, Senator Syas, would be to let all the people...that is all the people in the state vote.....Senator Syas, what is wrong with letting all of the people vote? Why are you always against letting the people vote on a measure like this? It always seems to me, Senator Syas, if we went back to the Millard annexation and to this particular issue, you never let the people vote, Senator Syas.

PRESIDENT: The issue before us is to indefinitely postpone LB649.....not Millard.....

SENATOR MAHONEY: Yes, and I will tell you, Mr. President, that the issue is that this is a vote of the people and you will not.....

(End of Belt #5A)

(Begin Belt #6A)

correct me on this because I am comparing this to Millard. And if you want me to overrule, I will do so. I'm giving my speech now and I'm going to go through with it. I'm going to.....

PRESIDENT: Proceed, you have the floor, Senator Mahoney.

SENATOR MAHONEY: That's right and Mr. President, it is not your position to completely take over the debate and take it away from a person. You are known for this. So in closing I would say to Senator Syas and to the Republican party which you are, Mr. President, in which you showed your bias, that this is a particular area that the people should be allowed to vote. And if Senator Syas and yourself, Mr. Marsh, do not want the people to vote, then you will kill this bill.

PRESIDENT: Next to speak is Senator Maresh and then Senator Marvel and then Senator Anderson. The motion before the Body is to indefinitely postpone LB649.

SENATOR MARESH: Mr. President and members of the Legislature. I just wanted to correct the cost of this bill. It's \$15,000 instead of \$10,000 and I also would like to point out if this does get on the ballot, the two parties will work hard, spend a lot of money to promote this while the people who are opposing this will not spend the money to defeat it so that's something that we should look at. I will oppose....I will support the kill motion.
